Summary

Software Engineer with **3+ years of experience** building scalable Java/Spring Boot microservices and distributed systems in the travel and hospitality domain. Experienced in event-driven architecture, Azure Service Bus, and Kubernetes, supporting **45K+ users** and **100K+ daily API requests**. Skilled in AI engineering using MCP, Azure AI Foundry, and agentic workflows, with additional expertise in React/TypeScript and CI/CD automation.

Experience

Cognizant Technology Solutions (Client: American Airlines) *Noida, Uttar Pradesh*
Associate 09/2023 - Present

- Developed and maintained 6+ Spring Boot microservices for preference management, contact details, message history, and notification processing, supporting 45K+ users and APIs handling 100K+ requests daily across web and iOS.
- Built a resilient Azure Service Bus event-processing pipeline handling batches of up to **800 messages per call**, integrating **4 external systems** with retry mechanisms and SHA-256-based de-duplication to prevent duplicate notifications.
- Containerized Spring Boot microservices using Docker and automated CI/CD deployments with Azure Container Registry (ACR), KPaaS, and Azure Kubernetes Service (AKS).
- Automated security vulnerability remediation across 10+ repositories by leveraging GitHub Agentic Workflows to generate code fixes and draft pull requests for manual review.
- Engineered an **AI-powered test-case generation agent** using MCP server architecture, agents, and skills to generate test cases from user stories, saving the QA team 30 hours per week.
- Developed a self-healing locator mechanism using **Playwright and Azure AI Foundry** to identify and recover broken locators at runtime using DOM analysis and confidence scoring, reducing locator-related test failures by **67%**.

Skills

Programming Languages: Java, TypeScript, JavaScript, Python, SQL
Frameworks: Spring Boot, Spring Security, Spring Cloud, ReactJS, Redis, Apache Kafka
AI / GenAI: Azure AI Foundry, Claude, GitHub Copilot, MCP Servers, Spring AI, Vertex AI Studio
DevOps & Cloud: Docker, GitHub Actions, Azure, Azure DevOps
Engineering: Data Structures & Algorithms (DSA) , System Design (HLD/LLD), Git, SQL Server, MySQL

Projects

- **edorbit** | *Java, Spring Boot, Hibernate, SQL, MySQL, Docker, React, TypeScript, Three.js (R3F)* Live
  - Developed a 3D educational visualization platform using Java, Spring Boot microservices, Hibernate, and MySQL for backend services, with a React and TypeScript frontend rendering interactive 3D models using Three.js (R3F).
  - Implemented secure authentication and authorization using Spring Security and JWT, incorporating role-based access control, email verification, magic-link login, and reCAPTCHA.
  - Automated CI/CD deployments using GitHub Actions and Google Cloud App Engine, reducing manual effort.
- **Bhraman** | *Java, Firebase, Python, TensorFlow, CNN, 3D Models* GitHub
  - Developed Java backend functionality with Firebase integration for user authentication, profile management, monument search, and 3D viewing history.
  - Implemented a TensorFlow-based Convolutional Neural Network (CNN) for image recognition.

Education

- **Bachelor of Technology in Computer Science and Engineering** *2020 – 2023*
  Shri Ramswaroop Memorial College of Engineering and Management, Lucknow (AKTU) CGPA: 8.33
- **Diploma in Information Technology** *2016 – 2019*
  Hewett Polytechnic, Lucknow Percentage: 75%

Achievements and Certificates

Achievements: Grand Finalist - Smart India Hackathon (Top ~5% Nationally), Solved 350+ DSA Problems on LeetCode, HackerRank (4-Star Coder).

Certifications: Claude Certified Architect - Foundations, GH-300 - GitHub Copilot.
