Experience

Cognizant Technology Solutions Associate

Noida, Uttar Pradesh
04/2026 - Present

- Engineered a **self-healing test framework** using **Azure AI Foundry (GPT-4.1 Mini)** with **DOM analysis** and **LLM-based locator inference (75% confidence threshold)** to auto-recover broken UI selectors, reducing test maintenance effort.
- Built an **AI-powered test generation pipeline** using **MCP servers** from **ADO user stories** to auto-generated test cases, **ADO Test Plans**, and foundational **Playwright** automation scripts.

Cognizant Technology Solutions Programmer Analyst - GN

Noida, Uttar Pradesh
09/2023 - 03/2026

- Designed and implemented **RESTful APIs** using a modular service architecture for a **large U.S. airline client**, enabling reusable backend components across **multiple microservices** supporting **45K+ users**.
- Developed **Spring Boot microservices** for preferences management, contact details, and message history as part of a **10+ microservice architecture**, handling **20K+ API requests** and enabling scalable workflows.
- Engineered a **pub/sub messaging pipeline** on **Azure Service Bus**, developing a consumer service that processed inbound events and routed them to eligible handlers in real time — supporting a **high-availability, low-latency**.
- Built an end-to-end **UI automation framework using Playwright (TypeScript)**, automating **100+ E2E scenarios**, reducing regression cycle from **3 days to 4 hours** with **CI/CD integration**.

Skills

Languages: Java, TypeScript, JavaScript, SQL

Backend: Spring Boot, Spring Core, Spring Data JPA, Hibernate, Spring AI, Node.js, SQL Server, MySQL, Redis, Kafka

AI / GenAI: GitHub Copilot (GH-300 Certified), Azure AI Foundry, MCP Servers, Vertex AI Studio, Claude

Tech & Tools: Azure, Git, Docker, Maven, JUnit, GitHub Actions, GCP, Linux, ReactJS, Swagger, Playwright

Others: Linux, Multi-threading, Design Patterns, System Design (LLD/HLD), Agile,

Personal Projects

- edorbit** | Platform for visualizing educational diagrams using interactive 3D objects Live
 - Built a 3D educational visualization platform enabling exploration of diagrams by developing backend services using **Java, Spring Boot, Hibernate, MySQL** and rendering **GLB models** using **React, TypeScript, ThreeJS (R3F)**.
 - Improved platform security and user experience by implementing **JWT-based authentication, role-based access control**, email verification, magic-link login, and reCAPTCHA using **Spring Security and SMTP services**.
 - Automated build and deployment pipeline reducing manual deployment effort by configuring **CI/CD with GitHub Actions** and deploying frontend and backend services on **Google Cloud Platform (App Engine)**.
- OrbitAI** | AI-powered assistant for educational queries and explanations. Live
 - Built **Orbit AI**, an AI assistant enabling natural language queries and **LLM-powered responses** for educational content by integrating **Spring AI** with **Google Vertex AI**.
- Bhraman** | An AR app showcasing Indian heritage with real-time 3D models. GitHub
 - Built a **Java** backend with **Firestore integration** featuring user authentication, **search functionality**, profile management, and viewing history for 3D monuments.
 - Implemented TensorFlow-based CNN algorithm for image scanning in machine learning model.

Education

- Bachelor of Technology in Computer Science and Engineering** CGPA: 8.33/10
Shri Ramswaroop Memorial College of Engineering and Management, Lucknow (AKTU) Jun 2023
- Diploma in Information Technology** Percentage: 75%
Hewett Polytechnic, Lucknow Jun 2019

Achievements and Certificates

- GH-300: GitHub Copilot** Microsoft
- Prompt Design in Vertex AI Skill Badge** Google Cloud
- Grand Finalist - Smart India Hackathon** AICTE & MIC, Govt. of India
- Solved 250+ Data Structures and Algorithm problems** LeetCode
